

MOVING & CLEANING YOUR OUTDOOR FURNITURE

Our products are designed with craftsmanship built into each piece, from how it looks and performs to the last nut, bolt and screw.

The quality materials we use means our products are very heavy, and as such, we advise that you arrange some help when moving your furniture to avoid injuring yourself and/or damaging the product.

We recommend lifting - making sure the item is balanced - when moving your furniture. Dragging or tipping the furniture is not recommended, as doing so can put adverse pressure on the joint areas.

✓ LIFT

✗ DO NOT DRAG

✗ DO NOT TIP

✓ DAMP CLOTH

✓ PRESSURE WASH

✗ DO NOT PAINT OR VARNISH

Our products are impervious to water and resistant to algae, but it can still become dirty. The furniture does not require any surface treatment apart from the occasional clean with a damp cloth. For stubborn dirt you can use a pressure washer.
